AI/ML engineering student (Chennai) building agentic AI systems, RAG pipelines, and LLM-powered applications. Built multi-agent orchestration pipelines, PGVector RAG systems with Gemini embeddings, and production AI workflows with self-reflection loops. Won Intel AI Hackathon 2025 (1st/90+ teams) building a multimodal RAG system. Looking to contribute to agentic finance AI workflows from day one.

EDUCATION

2024–2028	B.Tech in Artificial Intelligence & Machine Learning , Saveetha Engineering College, Chennai <i>Coursework: Data Structures & Algorithms, OOP, Database Systems, Deep Learning, NLP</i> CGPA: 8.2
2024	HSLC, Velammal Vidyalaya, Chennai 87.4%
2022	SSLC, Velammal Vidyalaya, Chennai 90.2%

SKILLS

Languages:	Python (Adv), Java , C, SQL , JavaScript, HTML/CSS
AI / LLM:	Prompt Engineering , RAG Pipelines , Agentic Workflows , NLP, Gemini AI, OpenAI API, Claude API
ML / Data:	scikit-learn , RandomForest, TensorFlow, PyTorch, NumPy, Pandas, ONNX
Frameworks & Web:	FastAPI , React, Flask, REST APIs, WebSockets
Databases:	PostgreSQL , Supabase , PGVector , Firebase, Redis
Tools & Infra:	Git/GitHub, GitHub Actions, Google Cloud, VS Code, Docker (basic)

ACHIEVEMENTS

- **Intel AI Hackathon 2025 – 1st Place:** Built Enterprise360, a multimodal agentic AI pipeline with RAG on Intel OPEA; winner among 90+ teams
- **OpenAI Academy x NxtWave Buildathon – State-Level 1st Place; National Top 10**
- **VØID v1 Hackathon (VIT) – 2nd Runners-Up** among 90 teams
- **LeetCode 50 Days Badge (2025)** – Consistent daily problem-solving and strong DSA skills

PROJECT EXPERIENCE

- **Outreach Intelligence Agent – Multi-Agent Pipeline (Solo)** – Architected a 4-agent hierarchical pipeline for automated company research and personalized outreach generation. Implemented LLM self-reflection loops with rewrite routing, structured JSON validation, quality gates, and Tavily-grounded web search. Built prompt versioning and campaign persistence for production reliability. *Python, FastAPI, Claude API, Tavily API, Jinja2, SQLite, Pydantic*
- **Credifi – ML Credit Scoring Platform (Solo)** – Built an end-to-end financial credibility scoring system using RandomForest ML pipelines. Implemented feature engineering across 15+ financial indicators, a FastAPI serving layer with rate limiting, and a React dashboard for score visualization with production-grade error handling. *Python, FastAPI, scikit-learn, RandomForest, React, PostgreSQL*
- **CampusSync Edge AI (Solo)** – Engineered a full-stack AI platform with a production RAG pipeline using Gemini embeddings, PGVector retrieval, Redis caching, and structured prompt workflows. Implemented hallucination detection via secondary LLM validation and fallback chains (Gemini → Bytez). Trained a RandomForest classifier (82.1% F1 Macro) with ONNX export for client-side edge inference. *FastAPI, React, Supabase, PGVector, ONNX, Gemini AI, Redis, GitHub Actions*
- **Enterprise360 AI Assistant (Solo) – Intel Hackathon 1st Place** – Architected a multimodal agentic AI system extracting insights from PDFs, Excel, and audio via RAG pipelines on Intel OPEA. Designed hierarchical agent flows with context control to reduce hallucinations. Won 1st place among 90+ teams. *Python, React, Intel OPEA, STT, RAG Pipelines, Prompt Engineering*

CERTIFICATIONS

- 5-Day GenAI Intensive – Kaggle (Jan 2025)
Getting Started with Git and GitHub – IBM / Coursera
- Prompt Design in Vertex AI – Google Cloud Skill Badge
